### Risk warning

Collective Investment Schemes (unit trusts) are generally medium-to long-term investments. Past performance is not necessarily a guide to future investment performance. Unit trust prices are calculated on a net asset value basis. This means the price is the total net market value of all assets of the unit trust fund divided by the total number of units of the fund. Any market movements – for example in share prices, bond prices, money market prices or currency fluctuations - relevant to the underlying assets of the fund may cause the value of the underlying assets to go up or down. As a result, the price of your units may go up or down. Unit trusts are traded at the ruling forward price of the day, meaning that transactions are processed during the day before you or the Manager know what the price at the end of the day will be. The price and therefore the number of units involved in the transaction are only known on the following day. The unit trust fund may borrow up to 10% of the fund value, and it may also lend any scrip (proof of ownership of an investment instrument) that it holds to earn additional income. A M&G unit trust fund may consist of different fund classes that are subject to different fees and charges. The Manager will pay your Financial Adviser a standard ongoing adviser fee, which is included in the overall costs of the fund. A Collective Investment Schemes (CIS) summary with all fees and maximum initial and ongoing adviser fees is available on our website. The Manager may, at its discretion, close your chosen unit trust fund to new investors and to additional investments by existing investors to make sure that it is managed in accordance with its mandate. It may also stop your existing debit order investment. The Manager makes no guarantees as to the capital invested in the fund or the returns of the fund. Excessive withdrawals from the fund may place the fund under liquidity pressure and, in such circumstances, a process of ring fencing withdrawal instructions and managed pay outs over time may be followed. A money market fund is not a bank deposit account and The M&G Namibian Money Market Fund aims to maintain a constant price of 100 cents per unit. Foreign securities including foreign CIS funds may be included in unit trusts. As a result, those unit trusts may face material risks. The volatility of the fund may be higher and the liquidity of the underlying securities may be restricted due to relative market sizes and market conditions. The fund's ability to settle securities and to repatriate investment income, capital or the proceeds of sales of securities may be adversely affected for multiple reasons including market conditions, macro-economic and political circumstances. Further, the return on the security may be affected (positively or negatively) by the difference in tax regimes between the domestic and foreign tax jurisdictions. The availability of market information and information on any underlying sub-funds may be delayed. The investor acknowledges the inherent risk associated with the selected fund and that there are no guarantees. The Manager is a member of the Association of Unit Trusts in Namibia.

<b>Fund objective</b>	This Fund aims to achieve a high level of current income, while preserving capital and liquidity. The Fund's objective is achieved by investing in cash and other high quality money market instruments.		The Fund intends to offer investors a higher return than those offered by money market or pure income funds and aims to achieve a return of cash plus 2% p.a. (before fees). It invests in a wide range of income-producing assets, while seeking to protect capital and reduce volatility through active asset management.	The Fund aims to produce above inflation (or real) returns by investing in inflation-linked bonds, other interest-bearing securities and equities. The Fund has two objectives: 1. The primary objective is to outperform Namibian CPI by 4% per annum before fees and tax over rolling three-year periods. 2. The secondary objective is to aim for no losses over rolling 12-month periods.	The Fund aims to achieve steady growth of capital and income through global asset allocation and superior stock selection across all industry sectors.
